Computer Science
Tyler Stoaks
Submitted by Sam Masooman

This year, it was an easy decision for all of us, as Tyler has been amazing in so many ways. From being President of the highly active Computer Science Club, to his presence tutoring for multiple classes in the Computer Science Lab, to his ability to incorporate technologies (like 3D-printing) in everything, Tyler has always exceeded everyone's expectations. He makes learning fun for our students, and encourages student participation inside/outside of the classroom, both academically and socially. Our department has been very fortunate to have someone like Tyler around.
